ACKNOWLEDGEMENT

The author wishes to acknowledge and to thank the following people for their assistance, support, and patience during the completion of this project.

I am grateful to Dr. David de Rosenroll for his encouragement, his willingness to provide advice in moments of stress and for just being at the other end of a telephone or e-mail when I needed a point clarified or some additional information. I also thank him for his continuing belief in my ability to complete this project on time and well.

I am grateful to Dr. David de Rosenroll, Dr. Norah Trace, and the many other professors, who provided the solid counselling theory background, and emotional support, that enabled me to view my chosen field with greater understanding.

I am especially grateful to my family for their understanding, and patience, during a time when my preoccupation with course work and project obligations limited the personal attention I could give to their concerns.

DEDICATION

I dedicate this project to my daughter Cindy, her husband Sean, and their wonderful children, Lliam, Zoey and Gabriel. In watching them grow as a family, I see both the inner strength and the joy that togetherness, caring, structure and genuine family love, can bring to a child. It is my wish that every child could benefit from this type of love and guidance during their growing years.
